

Sajith Madhubashana

Software Engineer

A highly skilled and experienced Full Stack Developer with a deep understanding of both front-end and back-end technologies, as well as AI and ML development. I have extensive experience in developing complex web applications that meet diverse client needs.

WORK EXPERIENCE

APIS Technologies, Sri Lanka

● **Full-Stack Engineer** - Apr 2024 – Apr 2025

- Led architectural decisions and development strategies for high-quality software products.
- Integrated advanced security measures and optimized system performance.
- Engaged in client communication to align development objectives with business needs

● **Full-Stack Developer** - Nov 2021 – Mar 2024

- Designed, developed, and optimized full-stack applications for scalability and performance.
- Implemented CI/CD pipelines to streamline deployment and enhance efficiency.
- Utilized frameworks such as Laravel, Vue.js, and Flutter to build innovative solutions.

● **Associate Software Engineer** - Apr 2021 - Oct 2021

- Developed and maintained responsive mobile and web applications, ensuring seamless user experiences across devices.
- Led project management efforts, collaborating with teams to define scope, timelines, and deliverables.
- Conducted thorough code reviews to foster best practices and team collaboration.

Softo Solution, Sri Lanka

Web Developer Trainee - Oct 2020 - Apr 2021

- Developed and maintained applications using Laravel for back-end solutions, ensuring efficient data handling and API integration.
- Collaborated with design teams to implement UI/UX design principles, focusing on usability and enhancing user satisfaction.
- Designed visual assets and graphics as part of graphic design efforts, ensuring a cohesive and appealing brand identity across projects.
